ONE CENT.

PURELY BUSINESS!

The columns of a newspaper represent a cash value. No publisher can afford to pay any more than a merchant can toss over his counter-free gift of dry goods, groceries, etc., to a newspaper in legitimate business concern. Its cost must be paid by the publisher. Advertisements should be paid for, no matter what part of the paper they appear.

We Have!

Always contended for and maintain it is a fact that there is a higher order of intelligence evinced in the business of general merchandising by the people in this and nearby counties than most anywhere else. You will find few persons who do their shopping in Maysville who believe that \$4.95 will buy a \$12 suit of clothes. Our many years experience goes to show that people want good goods at reasonable prices, willing to pay a fair price. Our 1898 spring bazaar proves that the higher the class of goods the ready seller. Our beautiful Black and Blue Serge Suite (we sell them at \$15) has bounded into wonderful great favor with our good dressers. We have a beautiful line of them. The weather is getting right for our

SAMPSON IN COMMAND IN THE FRONT.

A Combined Attack on the City, Harbor and the Spanish Fleet to Be Made.

The Alleged Peace Movement of the Cuban Regan Has Not Yet Taken Any Form Either at the State Department or Foreign Embassies.

Washington, June 3.—It was plain noticeable at the navy department Thursday that the officials were expecting news of the first importance, but that they did not look for it immediately. The firmness with which they had insisted that Sampson would have had no general engagement with Spanish forces, ships and forts at Santiago, as was reported, appeared to be based on a knowledge of the plan under which the command is acting, and the greatest concession that they would make toward admitting that a fight had taken place there Tuesday was that they would wait until some detected some carbouloons going up and had razed them with his shells. They were confident he made no attempt to enter the harbor. It is believed, however, with Sampson in the lead and with the Spaniard with an augmented force, that interesting events may be looked for. There are expected two, notwithstanding the fact that no troops have yet started from Tampa, as was established by inquiry at the war department Thursday afternoon.

The insurgents are known to be in force in the neighborhood of Santiago, and the naval authorities of the war department not only have been in communication with them but have supplied them fully with good weapons and an abundance of ammunition.

The headquarters of the bat of the Cuban rebels, Garcia, are about from Santiago only about 75 miles, so that it is possible Sampson feels strong enough with their support to begin the assault by sea upon the remaining Spanish ships and forts without awaiting the arrival of the United States troops from Tampa. The trend of the news that came to Washington from undivulged sources during the past few days is all in support to this, so there is some ground for the expectation of the officials that important information may be expected shortly.

The Spanish government has made a protest to the British authorities against the shipping of Canadian coal from British North America to San Francisco for the relief of the ships of Adm. Dewey at Manila, and also against the shipping of coal from Nova Scotia to Atlantic ports for use by United States war ships operating in the West Indies.

In view of the call by the British government that coal was contraband of war this protest by Spain might have caused considerable embarrassment, as the Canadian coal is considered by the naval authorities to be a superior fuel for our own ships. It is only a short distance from the British North American coal fields to San Francisco and the Nova Scotian coal fields are also easily accessible to Atlantic ports. It is understood, however, that Spain's protest was not proved of any avail. The subject was referred to the Canadian authorities who, upon investigation, learned that the coal shipments from British North America and from Nova Scotia were in the ordinary course of commercial transaction. They were made by private parties in Canada to private parties in the United States, and the coal was not contraband.

It was the Spanish government that was made by private parties in Canada to private parties in the United States, and the coal was not contraband. If the queen regent of Spain has instructed Senor Castillo to ask the powers to intervene for peace, that movement has not taken any form in Washington either at the state department or at any of the foreign embassies. Among diplomatic officials it is thought to be quite possible that France, in her bid for a way toward securing peace, but it is not believed this will meet any active assistance from the great powers. As one leading diplomatic official said, "Spain is not in a position to afford us the same condition of isolation that France was in 1870-71. At that time M. Thiers, afterwards president, went from capital to capital seeking to secure the co-operation of Europe with France, his bid was a failure. The mission of Castillo is said to be like that of Thiers and the diplomatic officials believe it is not in the same fate. It is known that Spain has counted most on arousing the active interest of France, but it has been unsuccessful. The French authorities have not heard of the negotiations, and most of past history shows that the authorities at Paris have not taken up the propositions of Senor Castillo for intervention in behalf of Spain."

Get More and You Get Less

Why is it every sarsaparilla which tries to sell itself, ranges itself against Ayer's as the standard? Why is it that all have to offer something—bigger bottles, fancy wrappings, cheaper price—anything, everything, but the one inducement of quality?

Ayer's Sarsaparilla

has never been equaled by any cheap imitation of it, and quality tells, just as blood tells.

It is the Standard.

"I have sold Ayer's Sarsaparilla for more than twenty-five years, and have never heard anything but words of praise from my customers; not a single complaint has ever reached me. A preparation must be great indeed to receive such commendation. I believe your sarsaparilla to be the best blood purifier that has ever been introduced to the general public."

"As good as Ayer's," but no one ever yet heard it said that Ayer's was "as good" as any other sarsaparilla. They always say Ayer's is the standard of excellence."—E. F. BOYCE, Duluth, Minn.

COX FOR CONGRESS

Press Opinions on the Candidacy of Our Fellow-Citizen.

LOOKS LIKE HE'S IN THE LEAD.

Cynthiana Democrat.

The MAYVILLE PUBLIC LEDGER backs Mr. W. H. Cox strongly for the Republican nomination for Congress.

Mr. Pugh is saving a great deal of wood, judging from the intense stillness around Vanceburg. And grim and gaunt stand all the Republican newspapers of the District, saving, of course, the fearless LEMON MUM as oysters, communicative as clams, the great apostle of high Tariff, strong trusts and impregnable combines await in gloomy silence the vaulting of the feline. Why don't they have the courage to go skin the cat?

[The esteemed Democrat is a trifling partial. The Dover Public Messenger, the Lemon's valued Mason county Republican contemporary, is also urging the candidacy of Mr. Cox, and is doing it most effectively.—ED. LEDGER]

Dover Public Messenger.

The Hon. William H. Cox, ex Mayor of Mayville and one of the most prominent Republicans in the state of Kentucky, is mentioned as a possible candidate for the Republican nomination for Congress from the Ninth District. Mr. Cox possesses in a marked degree all the attributes which constitute the ideal Congressman—ability, integrity, progressiveness and determination. He is a Republican inspired by patriotism, and a native citizen of our beloved county of Mason whom we should all delight to honor. If we are to have a candidate, why not the Hon. William H. Cox?

The great institution of Manila is the lottery. This is drawn monthly, the prizes ranging from \$5 to \$80,000. It is managed by the public officials and by the Archbishop, and \$200,000 each month is collected for the state and the Church. It is from this lottery that Spain and the Roman Catholic Church in the Philippines derive much of their enormous revenues.

Wages of farm laborers are about five cents per day, and each man is required to pay an annual tax of from \$1.50 to \$25. Much of this tax goes to the Church, since it is Church officials who collect it all. The Archbishop forbids the sale of farm products, but requires them to be simply exchanged.

There is a tax for the benefit of the Church on coconut trees, on animals when killed for food, on shops, mills and oil presses, and a particularly high tax on cock fights, which are the National pastimes of the people. Incidentally, it may be explained that the word *Cevite* means *cockfight*.

The education of the young on the islands is in the care of the Roman Catholic Church authorities. There are no endowed schools and no hospitals. The children go to school only one hour per day for two days each week, and study almost nothing save Church history and a few verbs. Writing is not taught, and reading is taught only to the upper classes.

All news published is censored by the Archbishop of Luzen. This island gets its name, by the way, from "Isosong," a wood mortar kept by the Indians just outside their doors, in which they daily wash their rice before cooking it. The only newspaper in the Philippines is printed in Spanish, and everything in it has been approved by the Archbishop.
